## WEBSITES, PORTFOLIOS, PROFILES

---

- **GitHub:** <https://github.com/Harish2915>
- **Portfolio:** <https://harish2913.netlify.app>
- **LinkedIn:** <https://www.linkedin.com/in/harish2913>

---

## SUMMARY

---

Motivated Artificial Intelligence and Data Science undergraduate with hands-on experience in Full Stack Development using Python, FastAPI, React.js, and MySQL. Skilled in building scalable RESTful APIs and responsive web applications with strong backend–frontend integration. Possess practical experience through internships and academic projects with solid problem-solving abilities. Seeking an entry-level Software Developer or Full Stack Developer role to apply technical skills and contribute to real-world solutions.

---

## SKILLS

---

- **Programming:** Python, JavaScript, SQL
- **Web Technologies:** HTML, CSS, REST APIs, GraphQL, JWT Authentication
- **Tools:** Git, GitHub, Postman, MySQL Workbench
- **Frameworks:** FastAPI, React.js, Bootstrap, SQLAlchemy
- **Database:** MySQL
- **Concepts:** Full Stack Development, API Development, Responsive Design

---

## WORK HISTORY

---

### Full Stack Developer Intern

#### Younder Bots (OPC) Pvt Ltd | Sep 2025 – Jan 2026

- Developed and integrated RESTful APIs using FastAPI and MySQL, enabling efficient backend data processing and system communication.
- Built responsive frontend components using React.js and collaborated with cross-functional teams to develop scalable full-stack applications.
- Contributed to debugging, testing, and deployment workflows, improving application reliability and performance.
- Gained hands-on experience in the Software Development Life Cycle (SDLC), backend architecture, and API integration.

---

## EDUCATION

---

### Bachelor's Degree:

#### Erode Sengunthar Engineering College | 2022 - 2026

- Artificial Intelligence and Data Science
- CGPA: 7.57 (up to 7<sup>th</sup> Semester)

### Higher Secondary:

#### Sengunthar Higher Secondary School | 2022

- Computer Science - 72%

---

## PROJECTS

---

### Smart Management System

- **Technologies:** Python, FastAPI, React.js, MySQL, JWT Authentication, Bootstrap
- Engineered a full stack web application with secure role-based authentication using JWT for admin and user access.
- Created RESTful APIs with FastAPI connected to a MySQL database for efficient data management.
- Built responsive dashboards using React.js and Bootstrap for task tracking and user management.
- Implemented CRUD operations, authorization mechanisms, and relational database structures for secure data handling.

### Student Management System

- **Technologies:** Python, FastAPI, MySQL, HTML, CSS, GraphQL
- Designed a web-based platform for managing student records with authentication and database connectivity.
- Managed student information and payment data through structured CRUD operations.
- Created user-friendly interfaces for data entry, retrieval, and administrative workflows.
- Integrated backend services with MySQL to ensure reliable data storage and system performance.

### Crime Rate Prediction System

- **Technologies:** Python, Machine Learning, Pandas, NumPy, Scikit-learn, Matplotlib, Flask
- Built a machine learning model to predict crime rates using historical datasets and supervised learning techniques.
- Performed data preprocessing, feature engineering, and exploratory analysis using Pandas and NumPy.
- Applied regression and classification algorithms with Scikit-learn to identify crime trends and patterns.
- Visualized analytical insights using Matplotlib and deployed a Flask-based interface for user predictions.
