SUMMARY

Motivated Artificial Intelligence and Data Science undergraduate with hands-on experience in full stack development using Python, FastAPI, React.js, and MySQL. Skilled in building scalable web applications, RESTful APIs, and responsive user interfaces with strong problem-solving and debugging abilities. Currently pursuing a Bachelor's degree with expected graduation in 2026 and seeking entry-level Software Developer or Full Stack Developer opportunities to apply technical knowledge in real-world projects.

SKILLS

- **Programming:** Python, JavaScript, SQL
- **Backend:** FastAPI, REST APIs, GraphQL, SQLAlchemy
- **Tools:** Git, GitHub, Postman, MySQL Workbench
- **Frontend:** HTML, CSS, React.js, Bootstrap
- **Database:** MySQL
- **Concepts:** API Development, Full Stack Development

WORK EXPERIENCE

Full Stack Developer Intern

Sep 2025 - Jan 2026

Younder Bots (OPC) Pvt Ltd

- Developed and integrated REST APIs using FastAPI and MySQL.
- Worked on frontend interfaces using React.js to improve user experience.
- Collaborated with team members to design scalable web solutions.
- Gained hands-on experience in full stack architecture and deployment workflows.

EDUCATION

Bachelor's Degree :

Erode Sengunthar Engineering College

- Artificial Intelligence and Data Science
- GPA: 8.02

Higher Secondary :

Sengunthar Higher Secondary School

- Computer Science - 72 %

PROJECTS

Smart Management System

- **Technologies:** Python, FastAPI, React.js, MySQL, JWT Authentication, Bootstrap
- Developed a full stack web application with role-based authentication using JWT for secure user access.
- Designed and implemented RESTful APIs using FastAPI and integrated with a MySQL database.
- Built responsive frontend interfaces using React.js and Bootstrap for task and user management dashboards.
- Implemented CRUD operations, authorization controls, and database relationships for efficient data handling.
- Improved system usability by enabling admin and user role functionalities with secure API communication.

Student Management System

- **Technologies:** Python, FastAPI, MySQL, HTML, CSS, Graphql
- Developed a web-based student management platform with authentication and database integration.
- Implemented CRUD operations for managing student records and payment details.
- Designed responsive user interfaces for data entry, retrieval, and administrative management.

Crime Rate Prediction System

- **Technologies:** Python, Machine Learning, Pandas, NumPy, Scikit-learn, Matplotlib, Flask (optional)
- Developed a machine learning model to predict crime rates based on historical crime data using supervised learning algorithms.
- Performed data preprocessing, feature selection, and exploratory data analysis using Pandas and NumPy.
- Implemented regression and classification models using Scikit-learn to analyze crime trends and improve prediction accuracy.
- Visualized crime patterns and insights using Matplotlib to support data-driven decision making.
- Designed a simple web interface using Flask to display prediction results for user input parameters.
